Good Lives Model

The Good Lives Model (GLM) of Offender Rehabilitation: A Strengths-Based Approach for Lives in Transition

The strengths-based rehabilitation model augments the risk, need and responsivity (RNR) principles through its focus on assisting clients to develop and implement meaningful life plans that are incompatible with offending

“The duty of society does not end with a prisoner’s release. There should therefore be governmental or private agencies capable of lending the released prisoner efficient aftercare directed towards the lessening of prejudice against him or her and towards his or her social rehabilitation”

Services are offered at:
